

Stool Sample Collection Instructions

1. Collect the stool sample 1-2 days before your scheduled health exam, If you have a colonoscopy scheduled on the same day of your health exam, you must collect the stool sample before taking a laxative. Female patients should avoid collecting stool samples during their menstrual period.
2. Do not let the sample touch the toilet water to avoid contamination with cleaning agents.
3. Please bring the samples to our hospital on the day of the examination. In case of a typhoon, rescheduling will be notified. If you have already collected stool samples, kindly inform our staff, and we will provide a new collection kit for your resampling.
4. **Based on the received stool examination instructions and the appearance of the specimen collection kit, please adhere to dietary precautions, follow the collection procedures, and ensure proper storage.**
